MAKE THE MOVE TO PROTECT THE ONES YOU LOVE

*"It takes less than an hour to write your Will
but the peace of mind lasts a life time."*

Free, no obligation consultations

Our legal experts will look carefully at your situation and provide you bespoke advice completely free of charge.

Write a Will or create an Estate Plan for peace of mind and to provide for your family through the generations

Don't put off the inevitable

Thinking about your Will and how you would like your Estate to pass on death can be an uncomfortable thing to do, however it is a thoughtful and responsible way to spare your family the emotional and financial burden of organising your Estate at the time they can least cope.

Talk to us and we can organise it all for you. We are a Will and Estate Planning Company based in the West Midlands with Consultants located Nationally. From the simplest Will to the most complex Estate we can advise on planning you would really like, rather than leaving your loved ones guessing what you might have wanted.

Why do I need a Will?

A Will is the only way to ensure your assets pass to those you wish to benefit. If you have no Will the laws of intestacy apply and the courts will decide where your assets go (intestacy or dying intestate means dying without a Will). Roughly 1 in 7 people die without making a Will, posing all sorts of problems for the people left behind.

Did you know without a Will...

- ❗ If you are not married your partner will not receive anything.
- ❗ Ex-partners could make a claim on your Estate.
- ❗ Children from previous relationships may not receive anything.
- ❗ Children under 18 may be taken into care whilst the courts choose who look after them.

What is Estate Planning?

Whilst writing a Will is better than no planning at all, in our experience the majority of clients would benefit from Estate Planning to deal with concerns such as:

- Inheritance Tax
- Long Term Care
- Divorce and Bankruptcy
- Business/Agricultural Assets
